Subject Index

Adsorption, 73
Adsorption phenomena, 157
Affinity membranes, 147
Amino acids, 263

Bacteriorhodopsin, 65
Boundary layer resistances, 119

Carbon dioxide, 139
Carboxylated poly(styrene) carrier, 263
Catalytic membrane reactor, 11
Cellulose acetate/alumina, 43
Ceramic membrane, 11, 251
Ceramic membranes, 27, 81
CO_2/CH_4 solubility selectivity, 231
Coated hollow fibers, 19
Cobalt, 197
Composite membranes, 101
Concentration polarisation, 51
Concentration polarization, 157
Crossflow microfiltration, 271

Demineralization, 205
Diffusion, 43, 109, 173
Dimethylsiloxane, 283
Dynamically formed membranes, 173

Emulsion liquid membrane, 165
Epoxidized polysulfone, 147
Extractive membrane bioreactor, 119

Facilitated transport, 139
Fiber membranes, 173
Flavors, 243
Foods, 243
Fouling, 51, 271

Gas permeation, 231
Gas permselectivity, 283
Gas separation, 219
Gas separations, 19, 27, 139, 231
Gas transport mechanism, 81
Glass membranes, 27

Halobacterium halobium, 65

Human serum albumin adsorption, 147
Hydrodynamics, 271
Hydrogen permeation, 251
Hydrogen separation, 11
Hydrophobic peptide, 73

Immobilized copper ions, 147
Inorganic membrane, 73
Inorganic membranes, 27, 219
Ion exchange membranes, 19, 101

Liquid membrane, 263
Liquid membranes, 139
Liquid permeability and separations, 101
Lithium ion selective transport, 165

Macrovoids, 43
Mass transport model, 205
Mechanism, 197
Membrane preparation and structure, 43, 101, 181
Membrane support, 73
Metallic membranes, 251
Microfiltration, 51
Microfiltration membranes, 1
Microporous, 81
Microporous and porous membranes, 43
Microporous membranes, 27
Model, 11
Molten salt hydrate membranes, 139

Nanofiltration, 205
Noncyclic synthetic ionophore, 165

1-O-Alkyl glycerol, 165
Organic pollutants, 119
Organic separations, 181, 243

Partition coefficient, 119
Permeability, 109
Permeation flux, 271
Pervaporation, 101, 109, 181, 243
Poly(ethylene oxide), 181
Poly(imide), 181
Poly(styrene-co-maleic anhydride), 283
